Revision date: 20.01.2020 Version: 03

# 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

KANSLER, ATF DEXRON VI, synthetic Product name

Product use Transmission oil

Company BLW Handel Gmbh

Wachtelstr. 13 12526 Berlin. Deutschland Address

+49 30 818 78 777 Phone

E-mail address info@kansler.de

112 Emergency telephone number

# 2.HAZARDS IDENTIFICATION

Classification of a mixture Not a hazardous substance or mixture according to Regulation (EC) No. 1272/2008.

This mixture is not classified as dangerous according to Directive 67/548/EEC.

Label elements The product does not need to be labelled in accordance with EC directives or

respective national laws.

Precautionary Statements P102 Keep out of reach of children.

P262 Do not get in eyes, on skin, or on clothing.

P273 Avoid release to the environment.

P281 Use personal protective equipment as required.

P501 Dispose of contents/container to authorized collecting centers.

Other hazards This substance/mixture contains no components considered to be either persistent,

bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB)

at levels of 0.1% or higher.

#### 3.COMPOSITION/INFORMATION ON INGREDIENT

Highly refined mineral oils and additives. Description:

Mineral oil contains DMSO-Extract < 3% (w/w) according to IP 346

# **4.FIRST AID MEASURES**

Description of first aid measures:

If swallowed, get immediate medical attention. Do not induce vomiting. After ingestion

After inhalation Move a person to fresh air if necessary.

Revision date: 20.01.2020 Version: 03

In case of skin contact Wash the skin with soap and water. Remove contaminated clothing as soon as

possible. Seek medical advice if symptoms persist

In case of eye contact Flush immediately with water for at least 15 minutes. Get medical advice if

discomfort continues. Continue to flush during transport to physician.

Most important symptoms and effects, both acute and delaye:

Symtoms/Injuries Risk of thermal burns on contact with hot oil.

Symptoms/injuries after inhalation May cause irritation to the eyes, nose, throat, and skin. Inhalation of mists or vapors

at elevated temperatures may cause respiratory irritation. Possible respiratory

damage following repeated or prolonged inhalation.

Symptoms/injuries after skin contact May cause moderate irritation. Risk of thermal burns on contact with molten

product. Prolonged or repeated contacts with the skin may cause dermatitis. Skin

rash/inflammation. Drying up of the skin.

Symptoms/injuries after eye contact May cause moderate irritation, including burning sensation, tearing, redness or

swelling.

Symptoms/injuries after ingestion Ingestion of large amounts may produce some discomfort and gastrointestinal

disturbances including a laxative action.

Indication of any immediate medical attention and special treatment needed:

First aid kits Clean, warm water, soap, drinking water.

### 5.FIREFIGHTING MEASURE

Suitable extinguishing media Carbon dioxide (CO2), dry chemical powder, foam. Water fog. Apply aqueous

extinguishing media carefully to prevent frothing/steam explosion.

Special hazards arising from the

substance or mixture

Advice for firefighter

On combustion forms: Carbon dioxide. Carbon monoxide. Smokes. Hydrocarbons. Nitrogen oxides (NOx). Phosphorus oxides. Zinc oxide. Sulfur oxides. Material will burn but does not easily ignite. When heated above the flash point, releases vapor. Vapors can travel considerable distances to a source of ignition where they can ignite, flash back, or explode. Mist or spray may burn at temperature below flash point.

Wear proper protective equipment. Extra personal protection: complete protective clothing including self-contained breathing apparatus.

### **6.ACCIDENTAL RELEASE MEASURE**

Personal precautions, protective equipment and emergency procedures

Stop leak if safe to do so. Evacuate personnel to a safe area. Avoid any direct contact with the product. Avoid contact with skin, eye and clothing. Avoid breathing dust. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Spilled material may present a slipping hazard. Prevent entry to sewers and public waters. Wear

suitable protective clothing and eye/face protection.

Environmental precaution Do not flush down sewer or drainage systems, unless system is designed and

permitted to handle such material.

Revision date: 20.01.2020 Version: 0.3

Methods and material for containment and cleaning up

Wear suitable protective clothing. Stop leak if safe to do so. Spilled material may present a slipping hazard. Small spills: Clean up any spills as soon as possible, using an absorbent material to collect it. Contain large spills to maximize product recovery or disposal. Substance floats in water. Specialist clean-up methods may be required. Comply with applicable regulations.

Reference to other section

Refer to sections 1 (contact and emergency phone number), 8 and 13.

# 7.PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURE

Precautions for safe handling

Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used.

Conditions for safe storage, including any incompatibilities

Technical measures: Do not pressurize, cut, weld, braze, solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources.

Storage condition(s): Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly closed. Do not store near oxidizing agents.

Recommended Materials

For containers or container linings, use mild steel or high density polyethylene.

Specific end use

No additional information available

### **8.EXPOSURE CONTROLS/PERSONAL PROTECTION**

Control parameters:

Mineral oil TWA (ACGIH) 5 mg/m<sup>3</sup>
Mineral oil STEL (ACGIH) 10 mg/m<sup>3</sup>

Personal protective equipment: Respiratory protection

No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapours.

Hand protection

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean

Revision date: 20.01.2020 Version: 0.3

hands. After using gloves, hands should be washed and dried thoroughly. Application

of a non-perfumed moisturizer is recommended.

Skin and body protection When skin contact is possible, protective clothing including gloves, apron, sleeves,

boots, head and face protection must be worn. Wash contaminated clothing before

reuse.

Eyes/face protection Safety glasses with side-shields. Use splash goggles when eye contact due to

splashing is possible. Wear googles and face shield if material is heated above 51°C.

Hygiene measure Handle in accordance with good industrial hygiene and safety practice. Avoid contact

with skin and eyes. Wash hands thoroughly after handling. Wash hands and other exposed areas with mild soap and water before eat, drink or smoke and when leaving work. DO NOT use gasoline, kerosene, solvents, or harsh abrasives as skin cleansers. Remove all contaminated clothing and footwear. Wash contaminated clothing prior

to re-use.

### 9.PHYSICAL AND CHEMICAL PROPERTIES

Appearance Liquid

Odor Characteristic, mineral oil

Odor Threshold Not established
pH Not applicable
Melting Point / Freezing Point Not established

Initial Boiling Point and Boiling 335~507 °C

Range

Flash point 230 °C (COC)
Not established
Flammability
Not applicable
Upper/Lower Flammability or
Not established

opper/ cower mainimability of

Explosive Limits

Octanol/Water

Auto-ignition Temperature  $> 290\,^{\circ}\text{C}$  Decomposition Temperature Not established Viscosity 6.1 cSt  $= 100\,^{\circ}\text{C}$ 

# **10.STABILITY AND REACTIVITY**

Reactivity No information available.

Chemical stability Stable when applying the recommended regulations for storage and handling.

Further information on correct storage: refer to chapter 7.

Revision date: 20 01 2020 Version: N3

Possibility of hazardous reaction No information available.

Conditions to avoid Stable when applying the recommended regulations for storage and handling.

Further information on correct storage: refer to chapter 7. Hazardous

decomposition byproducts may form with exposure to high temperatures.

Incompatible materials Keep away from strong acids, strong bases and strong oxidizing agents to avoid

exothermic reactions.

Hazardous decomposition byproducts may form with exposure to high Hazardous decomposition product

temperatures, e.g.: carbon dioxide, carbon monoxide, smoke, nitrogen oxides.

# 11. TOXICOLOGICAL INFORMATION

Information on toxicological effects:

LD50 Oral - Rat - male and female - > 5.000 mg/kg. Acute toxicity

(DECD Test Guideline 401)

LC50 Inhalation - Rat - male and female - 4 h - > 5 mg/l.

(DECD Test Guideline 403) LD50 Dermal - Rabbit - male. (DECD Test Guideline 402)

Skin Irritation Expected to be slightly irritating. Prolonged or repeated skin contact without

proper cleaning can clog the pores of the skin resulting in disorders such as oil

acne/folliculitis.

Eye Irritation Expected to be slightly irritating.

Sensitization Not expected to be a skin sensitizer.

Repeated dose toxicity No data available.

This product contains mineral oils which are considered to be severely refined and Carcinogenicity

not considered to be carcinogenic under IARC. All of the oils in this product have

been demonstrated to contain less than 3% extractable by the IP 346 test.

Mutagenicity Not expected to be mutagenic.

Toxicity for reproduction Not expected to be toxic.

Information on likely routes of exposure:

After inhalation Inhalation of vapors may cause respiratory irritation.

After contact with skin Prolonged or repeated skin contact with the material will remove natural oils and

could lead to dermatitis.

After contact with eyes Flush immediately with water for at least 15 minutes. Get medical advice if

discomfort continues. Continue to flush during transport to physician.

Revision date: 20.01.2020 Version: 0.3

After ingestion Ingestion may cause nausea, vomiting and diarrhea.

Delayed and immediate effects as well as chronic effects from short and longterm exposure No adverse health effects were noted.

Other information No data available.

# 12. ECOLOGICAL INFORMATION

Toxicity Static test LC50-Oncorhynchus mykiss (rainbow trout)->100 mg/l-96h

(DECD Test Guideline 203).

Static test LC50 - Daphnia magna (Water flea)-> 100 mg/l-48 h

(OECD Test Guideline 202).

Persistence and degradability Expected to be not readily biodegradable. Major constituents are expected to be

inherently biodegradable, but the product contains components that may persist

in the environment.

Bioaccumulative potential Contains components with the potential to bioaccumulate.

Mobility in soil. Some or a few components may get into

the soil and may cause pollution of ground water. Product spreads on the water

surface.

Results of PBT and vPvB assessment This substance/mixture contains no components considered to be either

persistent, bioaccumulative and toxic (PBT), or very persistent and very

bioaccumulative (vPvB) at levels of 0.1% or higher.

Other adverse effects Product is a mixture of non-volatile components, which are not expected to be

released to air in any significant quantities. Not expected to have ozone depletion

potential, photochemical ozone creation potential or global warming potential.

# 13. DISPOSAL CONSIDERATIONS

Material Disposal Recover or recycle if possible. It is the responsibility of the waste generator to

determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in

water courses.

Container Disposal Dispose in accordance with prevailing regulations, preferably to a recognized

collector or contractor. The competence of the collector or contractor should be

established beforehand.

Local Legislation Disposal should be in accordance with applicable regional, national, and local laws

and regulations.

### 14. TRANSPORT INFORMATION

Revision date: 20.01.2020 Version: 0.3

The substance is not a subject to transport regulations on hazardous goods included in ADR (road transport), RID (rail transport), IMDG (marine transport) and ICAO/IATA (air transport):

UN number
UN proper shipping name
Not applicable.
Transport hazard class(es)
Packing group
Not applicable.
Environmental hazards
Special precautions for use
Not applicable.
Not applicable.
Not applicable.

# 15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture: This safety datasheet complies with the requirements of Regulation (EC) No. 1907/2006.

Chemical safety assessment:

For this product, a chemical safety assessment was not carried out.

# **16. OTHER INFORMATION**

Key or legend to abbreviations and acronyms used in the safety data sheet:

ADR : European Agreement concerning the International Carriage of

Dangerous Goods by Road DNEL : Derived No Effect Level

EINECS: European Inventory of Existing Commercial Chemical

Substances (EINECS) EN : European Standard ES : Exposure Scenario EU : European Union

IATA: International Air Transport Association

LC50: Lethal Concentration to 50 % of a test population

LD50 : Lethal Dose to 50% of a test population (Median Lethal Dose)

NDSL: Non-Domestic Substances List (NDSL)

OEL : Occupational Exposure Limit
PEC : Predicted Effect Concentration
PNEC : Predicted No Effect Concentration
PPE : Personal Protection Equipment

RID : Regulations concerning the International Carriage of Dangerous

Goods by Rail

STEL : Short term exposure limit TWA : time weighted average
