

BRAKE FLUID

DESCRIPTION

DOT-3 is formulated from mixed polyalkylene glycol ethers together with lubricity additives and corrosion inhibitors. DOT-3 is designed for use in the hydraulic brake and clutch systems of passenger cars and commercial vehicles. Suitable for disc or drum brake systems.

BENEFITS

- Excellent protection against corrosion and wear
- Good thermal stability
- Fully compatible with other brake fluids DOT-3/4
- Compatible with rubber components

PERFORMANCE LEVEL

- SAE J1703/J1704
- ISO 4925
- FMVSS 116

AVAILABLE IN
250g, 455g

TECHNICAL PROPERTIES

CHARACTERISTIC	TEST METHOD	TYPICAL VALUE
Appearance	Visual	C&B
Density at 20°C, g/ml	ASTM D4052	1,070
pH value	FMVSS 116	7
Kinematic viscosity at -40°C, mm ² /s	ASTM D445	1170
Kinematic viscosity at 100°C, mm ² /s	ASTM D445	2
Equilibrium Reflux Boiling Point	FMVSS 116	220
Wet Equilibrium Reflux Boiling Point	FMVSS 116	150
